ALABAMA DEPARTMENT OF INDUSTRIAL RELATIONS
MINING AND RECLAMATION DIVISION
MINE SAFETY AND INSPECTION SECTION

The office of Mine Safety and Inspection is located in the underground mining and heavy industrial section of Alabama at 11 West Oxmoor Road, Suite 201, in Birmingham, Alabama. The Mine Safety and Inspection Section is concerned with five main functions:

Making inspections to determine compliance with State Mine Safety and Reclamation Laws and rules and taking appropriate enforcement action.

Preparing rules and regulations for the prevention of accidents and maintenance of safe and healthful working conditions in the mining industry and preparing these for submission to the Board of Appeals.

Providing information to the public; conducting educational programs to promote safety and health in places of employment; organizing safety programs or safety departments in the State's mining industry.

Investigating and preparing studies, compiling statistics and publishing reports about the condition of safety devices and methods of protection against accidents, illness and death in employment.

Supplying state schools and colleges with literature concerning the Alabama Coal Mining Law as well as Safety Rule Manuals and other publications concerning both underground and open pit mining for use in industrial and mining courses. These manuals also are supplied to mining firms for use in safety courses for mine foremen and fire bosses.

During fiscal year 2010, coal production reported in Alabama was 20,276,968 tons. Three fatalities occurred in coal mining during the year. The non-coal sector produced 57,581,882 tons and one fatal accident occurred in this sector.

There were 1,501 complete inspections at mines and quarries. These required 2,485 field days by inspectors and resulted in 392 exceptions. There were 4,236 miners employed in the coal mining industry. An additional 2,198 miners were employed in non-coal mines and quarries. A total of 6,434 miners were employed in the mining industry at the end of fiscal year 2010.

Sixty-one miners received underground mine foreman certificates of competency and sixteen miners received fireboss certificates of competency. Fifty-nine miners received surface mine foreman certificates of competency. Four previously certified foremen voluntarily surrendered their certificates to the Board of Mine Examiners.
