ALABAMA DEPARTMENT OF WORKFORCE
MINING AND RECLAMATION DIVISION
MINE SAFETY AND INSPECTION SECTION

The Office of Mine Safety and Inspection is located in the underground mining and heavy industrial section of Alabama at 1400 Urban Center Drive Suite 200, Vestavia Hills, Alabama. The Mine Safety and Inspection Section is concerned with five main functions:

Making inspections to determine compliance with State Mine Safety and Reclamation Laws and rules and taking appropriate enforcement action.

Preparing rules and regulations for the prevention of accidents and maintenance of safe and healthful working conditions in the mining industry and preparing these for submission to the Board of Appeals.

Providing information to the public; conducting educational programs to promote safety and health in places of employment; organizing safety programs or safety departments in the State's mining industry.

Investigating and preparing studies, compiling statistics and publishing reports about the condition of safety devices and methods of protection against accidents, illness and death in employment.

Supplying state schools and colleges with literature concerning the Alabama Coal Mining Law as well as Safety Rule Manuals and other publications concerning both underground and open pit mining for use in industrial and mining courses. These manuals also are supplied to mining firms for use in safety courses for mine foremen and fire bosses.

During Fiscal Year 2025, coal production reported in Alabama was 13,624,285 tons. There were no fatalities in coal mining during the year. The non-coal sector produced 46,408,016 tons, and there were no fatalities during the year.

There were 565 complete inspections at mines and quarries. These required 853 field days by inspectors and resulted in 239 exceptions. There were 2,378 miners employed in the coal mining industry. An additional 2,235 miners were employed in non-coal mines and quarries. A total of 4,613 miners were employed in the mining industry at the end of Fiscal Year 2025.

Sixty miners received underground mine foreman certificates of competency; two miners received upgrade; and thirteen miners received fireboss certificates of competency. Fourteen miners received surface mine foreman certificates of competency.
